

Carlos Javier Ortiz Domínguez

113 San Gregorio Street Apt. 1, Havana | +53 5 528 3129 | ortizdcj@gmail.com

Education

AUTOMATIC ENGINEER | 2019 | UNIVERSIDAD TECNOLÓGICA DE LA HABANA JOSÉ ANTONIO ECHEVERRÍA (CUJAE)

- **Paper:** Design of a remotely controlled home automation system using Arduino microcontrollers.

Skills

PROGRAMMING LANGUAGES

- C
- C++
- C#
- Python
- JavaScript
- TypeScript
- MatLab

SOFTWARE DEVELOPMENT AND FRAMEWORKS

- ASP.NET
- Entity Framework Core
- REST APIs
- WPF
- Blazor
- DocFx
- Object-Oriented Programming
- Design Patterns
- Algorithm Design
- .NET Core
- FastAPI
- Node.js
- GraphQL
- OAuth2/OIDC
- Jinja2

VERSION CONTROL AND TOOLS

- Git
- GitHub Actions

SYSTEMS AND PLATFORMS

- Linux
- PostgreSQL
- MongoDB
- SQL Databases

DESIGN AND HARDWARE

- PCB Design
- Microcontroller Programming
- PLC

COMMUNICATION PROTOCOLS

- Modbus RTU
- Modbus TCP
- IEC 60870-5-101
- IEC 60870-5-104

SUBSTATION CONTROL SYSTEMS

- PCVue-Seefox Electrical Substation Control Systems

LANGUAGES

- Spanish (native)
- English (B2)

Experience

SENIOR SOFTWARE ENGINEER | TREEW | SEPTEMBER 2024 TO DATE

- Backend microservices and APIs for e-commerce with C#/.NET Core, Python/FastAPI, and Node.js — 25+ production services (GraphQL, REST, legacy).
- OAuth2/OIDC authentication; PostgreSQL and SQL Server database management.
- AI-powered Product Validator API: 13 OpenAI agents in parallel with vector stores for semantic search.
- Bulk SMS notification platform: multi-process, worker pools, PostgreSQL LISTEN/NOTIFY, Server-Sent Events.

COMPUTER SCIENCE SPECIALIST | GSI – GENERAL SOFTWARE INC | MAY 2023 TO MARCH 2026

- Backend APIs and microservices in .NET (Entity Framework Core, Docker) for e-commerce, SSO/IdentityServer, and fintech platforms (eMoney, accounts, credit cards).
- Serverless architecture on AWS (Lambda, Cognito) for a vision-insurance healthcare system, covering claims, authorizations, appeals, and member management.
- Full-stack development of a React/TypeScript web app (MUI, Vite, Cypress) and a Flutter mobile app integrated with backend APIs.
- WPF/.NET Framework industrial SCADA for bottling plant, with PLC communication and RFID-based traceability.

AUTOMATION SPECIALIST | ATI – TECNOLOGÍA DE LA INFORMACIÓN Y LA AUTOMÁTICA | OCTOBER 2019 TO MAY 2023

- Configuration and maintenance of the PCVue-Seefox Schneider Electric control system in 72 targets that provide information to the National Dispatch of Cuba.
- Setting up and incorporation of the Floating Power Plants (K-Power Ship) generation to the NES and the information transmission to the Load Dispatch.
- Web sites development to visualize variables in real time.
- Reconversion, configuration, assembly, and commissioning of the Remote Terminal Unit of the Electro Energetic Group for the new service the Granma Provincial Dispatch.
- Participate in the development of desktop applications with automated profiling.
